Re: RCRA Corrective Action Environmental Indicators at Macdermid Incorporated, 526  
Huntingdon Avenue, Waterbury, CT (CTD001164599)

Dear Mr. Strong,

Thank you for completing and submitting the Documentation of Environmental Indicator Determination and for taking the time for a facility tour and meeting on January 26, 2001. Based on a review of the Environmental Indicator Determination, the information contained in EPA-New England and State of Connecticut Department of Environmental Protection files, and the facility tour, we agree that for both Environmental Indicators, Current Human Exposures Under Control (RCRIS code CA725) and Migration of Contaminated Groundwater Under Control (RCRIS code CA750), more information is needed to make a determination (RCRIS status codes "IN").

As agreed to at the January 26 meeting, archived reports will be located by MacDermid employees and the data and site information will be summarized and organized chronologically. It is expected that the information will be gathered and organized within 4 weeks and presented to EPA for review in five weeks. Finally, we have scheduled a meeting on March 16 at the MacDermid Facility to discuss the available information and what, if any, additional data may need to be collected to achieve the Environmental Indicators.

We look forward to receiving the site information and to meeting with you again in March. Please feel free to contact me at (617) 918-1368 if you have any questions.

Sincerely,

Carolyn J. Casey  
RCRA Facility Manager
